Summary

Transformative Engineering Leadership

Offering comprehensive experience building and transforming full-stack web and mobile engineering teams at high-growth SaaS companies. This experience spans across healthcare and other high-security/high-compliance business sectors. Passionate about using AI/ML and large datasets to improve patient outcomes in Healthcare, and solve other hard problems to improve the human experience.

Proven Success in Application Architecture and Delivery

Demonstrated expertise in architecting and monitoring scalable, high-performing applications, databases, and APIs. Adept in delivering SaaS platforms (AWS & Azure), and implementing continuous delivery practices to enhance developer and user experiences.

Metrics-Driven Delivery, Scalability & Compliance

Committed to metrics-driven delivery, optimizing software solutions for real-world scalability, and ensuring organizational success through automation and a commitment to quality. Proven ability to implement practices that enhance performance and meet high standards of security, data privacy, and compliance.

Articulate & Empathic Communication

An articulate and empathic communicator, committed to cultivating and strengthening professional relationships with key clients and stakeholders. Known for creating a collaborative environment and addressing client needs effectively. Passionate about Adaptive Leadership.

Areas of Expertise

- Adaptive Leadership & Transformative Change
- Metrics Driven Performance Optimization
- Product Development & Launch
- Engineering Process Automation

- Continuous Delivery & Test Automation
- Budgeting & Cost Reduction
- Security & Compliance
- Stakeholder Management
- Client Relationship Building
- Contract Review & Negotiation
- Program Governance & Control

Technical Proficiencies

- Mobile Development: React Native (JavaScript, Typescript), iOS (Swift, Objective-C), Android (Kotlin, Java)
- Web Development: ReactJS (JavaScript, Typescript), .NET (C#)
- Full-Stack Building: API Contracts, Mocking and Integration
- Cloud Computing: AWS, Azure
- SaaS Platform Delivery: Micro-serviced and Monolithic Practices
- Agile Methodology: Scrum and Kanban
- WoW Architecture & Team Topology
- DevOps Practices: CI/CD, DORA, Test Automation, Everything as Code
- Applied AI/ML, Data Science and Integrity, Genomics & other Large Datasets

Experience

Fidelity Investments

Vice President of Software Engineering

December 2024 - Present (1 year 2 months)

Salt Lake County, Utah, United States

TigerConnect

Sr Director, Client App Engineering

May 2022 - December 2024 (2 years 8 months)

Santa Monica, California, United States

Drive global team expansion by overseeing full-stack web and mobile engineering teams across the US and near-shore locations. Measure and enhance engineer satisfaction and productivity through proven tooling and methodologies (Agile, DevOps, Team Topologies). Automate engineering and delivery processes. Build cloud-based, AI-powered platform services (AWS) and client apps to improve patient outcomes by minimizing collaboration inefficiencies within healthcare teams.

Controlled the design, development, testing, and deployment of all client-facing enterprise apps as part of an integrated product line:

- 7,000 Enterprise customers
- 600k Weekly Active Users (WAU)
- Continuous Delivery with bi-weekly releases for 4 apps
- Built traceability into system design, deployment and documentation to support FDA approval of Software as a Medical Device (SaMD)

Technologies/Specialties:

ReactJS, JavaScript, TypeScript, Swift, Objective-C, Kotlin, Java, Terraform, AWS Managed Services, AWS ECS/EC2/ECS Anywhere/Lambda, Jest, Appium, Selenium, Git, fastlane, Sentry APM, Jenkins, CircleCI, Pendo, OpsGenie, Jira, Confluence, Pluralsight Flow

LifeOmic

Director of Mobile Engineering, General Manager of Salt Lake Office
October 2017 - May 2022 (4 years 8 months)

Greater Salt Lake City Area

Developed a precision wellness platform for personal, organizational, and clinical wellness solutions. Leveraged AI/ML/NLP, genomics, and other large datasets for data-driven healthcare outcomes improvement. Built and led a high-performing, full-stack and cross-functional mobile engineering team of 20 FTEs and 5 contract engineers. Dotted line management of 40 engineers across all functional areas in the Salt Lake City office.

Oversaw the design, development, launch and growth of 4 successful health and wellness apps:

- iOS LIFE Fasting Android LIFE Fasting iOS LIFE Extend Android LIFE Extend
- 4+M downloads, 4.7 stars avg ratings, 200k Avg WAU
- Localized into 7 languages, freemium sub model + affiliate sales (B2C), enterprise paid customers (B2B)
- Continuous Delivery with weekly releases for all 4 apps
- 93% unit test coverage, optimal automated function regression and release test coverage
- Built security, compliance and traceability into system design, deployment and documentation to support FedRamp Marketplace approval

Technologies/Specialties:

React Native, JavaScript, Swift, Terraform, AWS Managed Services, AWS ECS/EC2/ECS Anywhere/Lambda, Jest, Appium, Git, fastlane, Runway, Jenkins, Bitrise, Mixpanel, Bugsnag, Instabug, AWS, PagerDuty

Health Catalyst

Lead Mobile Applications Engineer, Care Management Team Lead
August 2015 - September 2017 (2 years 2 months)

Greater Salt Lake City Area

Developed a Coordinated Care Team Management Platform, integrating medical providers to improve outcomes for the sickest 5% of patients who represent 50% of healthcare expenditures. Owned team ceremonies, managed recruiting and training for a diverse team of web, mobile, and platform engineers, while fostering a collaborative environment to ensure high performance and innovation. Aligned engineering practices with business objectives to enhance strategic outcomes. Bridged the communication gap with business stakeholders and Product Management to establish project scopes, oversee timelines, and allocate resources, ensuring successful product launches.

Key Projects:

- Native iOS and Android app development, database (SQL and No-SQL) and web service (Azure) design and development: Care Coordination, Care Companion

Technologies/Specialties:

Swift, Kotlin, Go, GORM, Azure, Docker, HealthKit, ResearchKit, Custom UI, Networking/Caching layer

ADP AdvancedMD

Senior iOS Engineer

March 2014 - August 2015 (1 year 6 months)

South Jordan, UT

Delivered SaaS solutions to private practice physicians, boosting financial health, enhancing patient focus, and increasing operational freedom and flexibility. Implemented Unit Testing, Automated UI Testing, and Continuous Integration, ensuring robust and reliable software delivery.

Key Projects:

- Native iOS app development. Apps available in the Apple app store: iPad Point of Care App, iPhone Point of Care App

Technologies/Specialties:

Swift, Objective-C, XMLRPC, SQL Server, API development and integration, HealthKit, Custom UIViews

ForeUP

iOS Engineer, Director of Mobile Development

August 2013 - March 2014 (8 months)

Orem, UT

ForeUP is revolutionizing golf course management software with a SaaS (software-as-a-service) platform that sets up in minutes, runs on any device, and costs a fraction of what older platforms charge.

- Architecting and engineering native iOS apps
- Building and managing mobile development team (currently iOS and Android)
- Project managing all mobile app development projects
- Developing and managing mobile product strategy and design

Marketing & Technology Group

VP, Information Systems

December 2008 - August 2013 (4 years 9 months)

Greater Chicago Area

Marketing & Technology Group is a B2B Media company with brands in the Hospitality, Foodservice and Meat Processing business sectors.

- Member, Executive Committee
- Managed Information Systems Department
- Directed product strategy and vision
- Built and managed software development team
- Architected, engineered and maintained iOS mobile apps, customer-facing websites and web applications, internal business systems and databases, email/content creation and distribution systems.

Marketing & Technology Group Inc.

8 years 4 months

Development Director

July 2003 - December 2008 (5 years 6 months)

Greater Chicago Area

Software Engineer

September 2000 - July 2003 (2 years 11 months)
Greater Chicago Area
